ABOUT US

Milan - the late '90s. Tired of struggling with the cold while getting around town on a scooter, we thought why not fix it? And so the **Termoscud**[®] leg cover was born. First just a few universal models and then increasingly specific designs for each scooter. Starting in Milan and then spreading to other big cities, to become 'the Tucano' or 'the Leg Cover' of choice: the one and only original leg cover for scooters, featuring the patented antiflap **S.G.A.S.** system.

Year by year, the **Termoscud**[®] has been joined by waterproofs, clothing, gloves, bags and a wide range of accessories addressing functionality, comfort and safety whilst always retaining that all-important Italian style. Designed to meet the needs of the urban traveller getting around at work and play. From home to work, from work to an evening out, for shopping and all the myriad daily chores: always protected in any weather and always ready for any event.

THERMAL RATING

 1st Class	 2nd Class	 3rd Class	 4th Class	 5th Class
---	---	---	---	---

INDICATIVE THERMAL RESISTANCE

The class is determined by these factors: type of outer fabric, fitting, weight and quality of the padding.

4 FITTING SIZES

- 1. SLIM:** follows the lines of the body.
- 2. REGULAR:** normal, neither slim nor loose.
- 3. COMFORT:** comfortably loose, also for jackets that are padded or have several layers or removable linings.
- 4. OVERALL:** very loose, typically for clothing such as rainwear that goes on top of multiple layers.

						
						
Slim	Regular	Comfort	Overall	Slim	Regular	Comfort

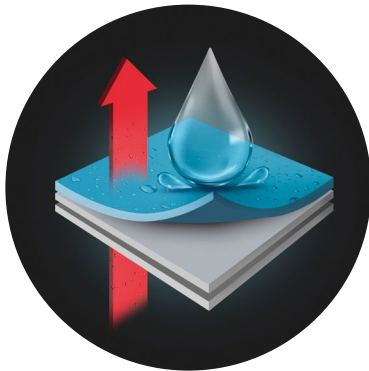

n /tuːkaˈnata/ [word comprising the noun Tucano (Urbano implied) + the suffix ata, coined in Milan at the end of the '90s when the city was invaded by swarms of motorcyclists wearing personalised helmets with donkey, mouse, cat and other animal ears]

1. Product or characteristic of a product which solves the problems and meets the needs of scooter and motorbike riders in an innovative, creative, unexpected and, why not, ironic way.
2. (ext.) Innovative unexpected gesture or creative gimmick whose originality expressed in an ironic, irreverent and, at times, visionary way, is a constant surprise.

OUR SYSTEMS

HYDROSCUD® is the registered system that guarantees waterproofing and breathability. 100% waterproofing against rain is guaranteed either by an inner membrane or the use of coated fabrics together with water run-off flap and taped seams. Breathability is ensured thanks to the membrane and the aeration systems positioned on the back and under the armholes.

WARMPOWER is the Tucano Urbano heating system that guarantees the best protection against the cold. Press the button and enjoy.

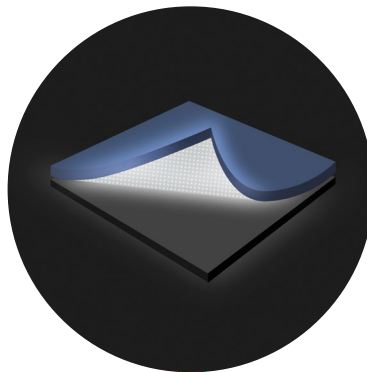

WINDSCUD is a special technical material which blocks 100% of wind while at the same time ensuring maximum breathability in extreme weather conditions. It provides a complete barrier against cold air yet allows the skin to breathe, ensuring warmth and comfort over long periods.

New **EASYFLEX** armour are featured by flexibility, ventilation and extreme lightness, they are almost unperceivable inside the garment in terms of thickness and weight

REFLECTIVE® SYSTEM is the registered system for Visibility on demand with retractable reflective inserts. During your journey the inserts can be kept in view to maximise safety and, on arrival, they can be hidden under the cuff, collar or hood for maximum style.

With **GOOD WHEELS**, we want to launch a real challenge for a world that is increasingly on the move on two wheels and careful to protect the urban environment. This is why we are following a path that will lead us towards increasingly sustainable production, starting with the very concept of thinking, designing and packaging all our products.

MANDELLI LAB

At Mandelli Lab, **18 individuals** collaborate and interact every day: engineers, designers, stylists, and model makers.

Men and women of different ages and different styles, all bound by a common thread: **a passion for motorcycles**, scooters, and bicycles, fueled by enthusiasm, enjoyment, and a practical spirit.

These three elements form the foundation of our extensive and meticulous **Research & Development work.**

AIRSCUD™ FLEX

AIRSCUD™ FLEX is a concentrate of innovation, functionality and design born from the perfect integration between **TUCANO URBANO**'s experience and the airbag system developed **by In&motion**, a French company, world leader in independent airbag protection systems powered by artificial intelligence.

EVOLUTION TECHNOLOGY AUTOMATIC UPDATES

Thanks to In&motion's artificial intelligence, it always ensures up-to-date and better versions of the detection algorithm.

FAST ACTIVATION IN A BLINK

In less than 60 milliseconds it detects the risk and completes the airbag deployment.

DETECTION ALGORITHM 1000 ANALYSES PER SECOND

Thanks to 7 sensors, the detection algorithm measures and analyses the user's parameters, 1000 times per second.

ACTIVE PROTECTION OF ALL VITAL AREAS

Compared to any other CE motorcycle certified jacket with protectors, it protects all vital areas: chest, abdomen, neck, and spine.

FAST AND AUTONOMOUS CARTRIDGE REPLACEMENT

In 5 minutes, safety checks are carried out and the cartridge is changed (AIRSCUD™ INFLATOR - code 00 133 0840, see pages 20 and 22).

RIDING MODE

Algorithm selection based on three riding modes:
1. Street; 2. Adventure; 3. Track

CERTIFICATION

It doesn't matter whether you're scooting for fun or doing serious riding: you're about to be hit by something totally new - if you are not already smitten get ready for a feeling of pride, of belonging.

With Tucano Urbano's line of bike and scooter clothing you'll find comfort, protection and a great look, plus a whole series of simple but effective technical devices.

This pictogram signals protective jackets for motorcyclists, certified in accordance with directive **EN17092:2020**.

Our jackets are **CE certified** to offer motorcyclists adequate protection against abrasion, ripping and impact without limiting the rider's movements, **when used on-road**; they have not been designed for particular activities or specific uses.

Abrasion and rip protection is guaranteed by high tenacity fabrics and resistant seams; the main impact zones, such as shoulders and elbows, have incorporated CE certified armour while there is a pocket on the back for specific armour.

The jackets certified in accordance with directive EN17092:2020 undergo the following tests:

- **Rip** resistance
- **Tear** resistance
- **Abrasion** resistance
- Impact force absorption
- Compliance with **specific requirements** regarding indications of the **size, quality** of the materials and **ergonomic characteristics**.

The tests are carried out and guaranteed by **specialised certification bodies**.

Read the information leaflet attached to the item for all technical information and indications about the limits of its use

Useful information

When choosing your gloves you should think about what you need in terms of heat insulation and sensitivity in your hands: a bulkier glove will offer better protection against the cold while a slimmer glove will offer you greater sensitivity when riding. In the case of leather gloves you should choose a fairly tight-fitting size as the leather will adapt to your hands with use. Finally, always try on different sizes to find the right one for the characteristics you want!

This symbol indicates “**protective gloves for motorcycle riders**” in compliance with the **EN 13594 standard**.

The **EN 13594** standard applies to **protective gloves for motorcycle riders on roads**.

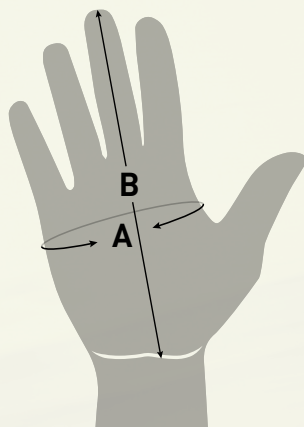

This type of glove **protects the hands and wrists from exposure to weather** and, in the event of accidents, **from impacts** with other vehicles/roadside infrastructure/road surfaces.

Gloves that comply with the EN 13594 standard must pass the following tests:

- **Tear** resistance
- **Cut** resistance
- Resistance to **abrasion**
- **Impact** resistance
- Compliance **with specific requirements** for indications of **size, quality** of materials and **ergonomic characteristics**.

The tests are carried out and certified by specialized third party laboratories.

LEG COVER AND HAND GRIP COVERS

TERMOSCUD® PRO

The evolution of the original Termoscud® leg cover, with new 4 SEASON SYSTEM to extend the period of use of the leg cover.

Hydroscud®

Insulation

BLACK

Custom models for specific scooters (for compatibility lists see pages 160-171 and our website www.tucanourbano.com).

Scan the QR to find out all the details.

Check the available video tutorials.

Thanks to the 4 SEASON SYSTEM, the new Termoscud® PRO offers the following advantages:

- During winter it guarantees maximum warmth and prevents flapping at high speed thanks to the patented anti-flap inflatable system (S.G.A.S.) fitted with a new valve.
- During the summer there is no need to remove it from the scooter: just remove the winter part and leave the rigid spoiler fixed to the bodywork, from where an emergency rain cover and practical seat cover can be pulled out when needed.

- HYDROSCUD® construction to guarantee waterproofing:
 - Outer cover in resistant and waterproof 1680 Ballistic and Dobby polyamide
 - Taped seams
- Thick winter quilt that can be removed in summer
- S.G.A.S.: patented anti-flap inflatable system, with valve fitted with incorporated cap and watertight closure

PATENTED SYSTEM

TERMOSCUD® EASY E19

The generic leg cover for scooters with flat footrests.

Waterproof

Insulation

BLACK - 40 749 1130

- General scooter leg covering with flat footrest
- Three-layer construction:
 - Waterproof outer shell
 - Waterproof inner membrane
 - Thermal fleece padding on legs
- Seat cover stored in the bib
- Reflective prints
- Outer hem with polyurethane foam insert

Model not equipped with patented anti-flap inflatable system (S.G.A.S.), recommended for electric scooters or urban use at approximately 50 km/h.

For frequent use at high speeds, we recommend the S.G.A.S.-equipped TERMOSCUD®, the leg covers to wear PANTA-FAST, TAKEAWAY, the padded PANTA DILUVIO pants and PANTAWARM.

Non-specific but generic model for scooters with a tunnel: it may interfere with storage compartments, the fuel cap, ignition lock, or other components.

It is recommended to assess the compatibility of installation with your scooter model and your needs or consider alternative

products such as the TERMOSCUD® with the S.G.A.S. system (if available for your vehicle), slip-on leg covers PANTA-FAST and TAKEAWAY, and PADDED DILUVIO PANTS and PANTAWARM.

Can be fitted without a mechanic or specialist.

Overall fit

Tucanata

- TUCANORAK HYDROSCUD® is the first rain garment designed to integrate perfectly with the Termoscud®, to guarantee maximum protection from bad weather: thanks to the innovative and practical **TERMOSCUD® READY** system, any infiltration of water between the bib of the leg covering and the rider's body is blocked. It takes just three simple steps to be READY for any downpour:
- Lift the right side of the front pocket of Tucanorak
- Put the Termoscud® bib under the pocket
- Close the pocket over the bib once more

• Waterproof jacket - **CE PPE Category 1**

• **HYDROSCUD®:**

- Outside in breathable, light polyamide, windproof and high water column resistant
- Taped seams (including collar)
- Double waterproof flap covering central zip (including collar)
- Waterproof design using velcro and zip

• **RAIN TOWER TESTED - EN 14360:2004**

- Requirements for protective clothing against rain compliant with standard EN 343:2019
- Jacket lining in polyester mesh
- Reflective inserts on the back
- Large front cargo pocket
- **TERMOSCUD® READY:** connection system to the Termoscud® bib to prevent any water infiltration onto the rider body
- Fitted shape to wrap hips
- Ergonomic hood folds into the neck
- Elastic waist adjustment
- Elastic and velcro adjustment on the cuffs

- Waterproofness 13000 mm
- Breathability 5000 g/m²/24 h

The evolution of the original Gauchopro leg cover, with new 4 SEASON SYSTEM to extend the period of use of the leg cover. Thanks to the 4 SEASON SYSTEM, the new Gauchopro offers the following advantages:

- For commuting during the winter months, it guarantees full thermal protection and avoids flapping at high speed by means of the patented S.G.A.S. system fitted with a new valve.
 - For touring use and, when needed, all year round, it can be easily and quickly removed from the motorbike: just detach the tapes that fix the leg cover to the plate on the fuel tank.
- HYDROSCUD® construction to guarantee waterproofing:
 - Outer cover in resistant and waterproof 1680 Ballistic and Dobby polyamide
 - Taped seams
 - Thick winter quilt
 - S.G.A.S.: patented anti-flap inflatable system, with valve fitted with incorporated cap and watertight closure
 - S.G.A.S. adapter included for manual/pump inflation: makes pumping hygienic and prevents air leakage when the valve is being closed
 - Anti-theft ring
 - Large storage pocket
