

TUR

SPIRIT OF ADVENTURING

2021 COLLECTION

SPIRIT OF ADVENTOURING.

T.ur as in tour, *T.ur* as in adventure, *T.ur* for those who are, *in moto, sempre in moto*.

T.ur, the new Tucano Urbano brand dedicated to adventouring.

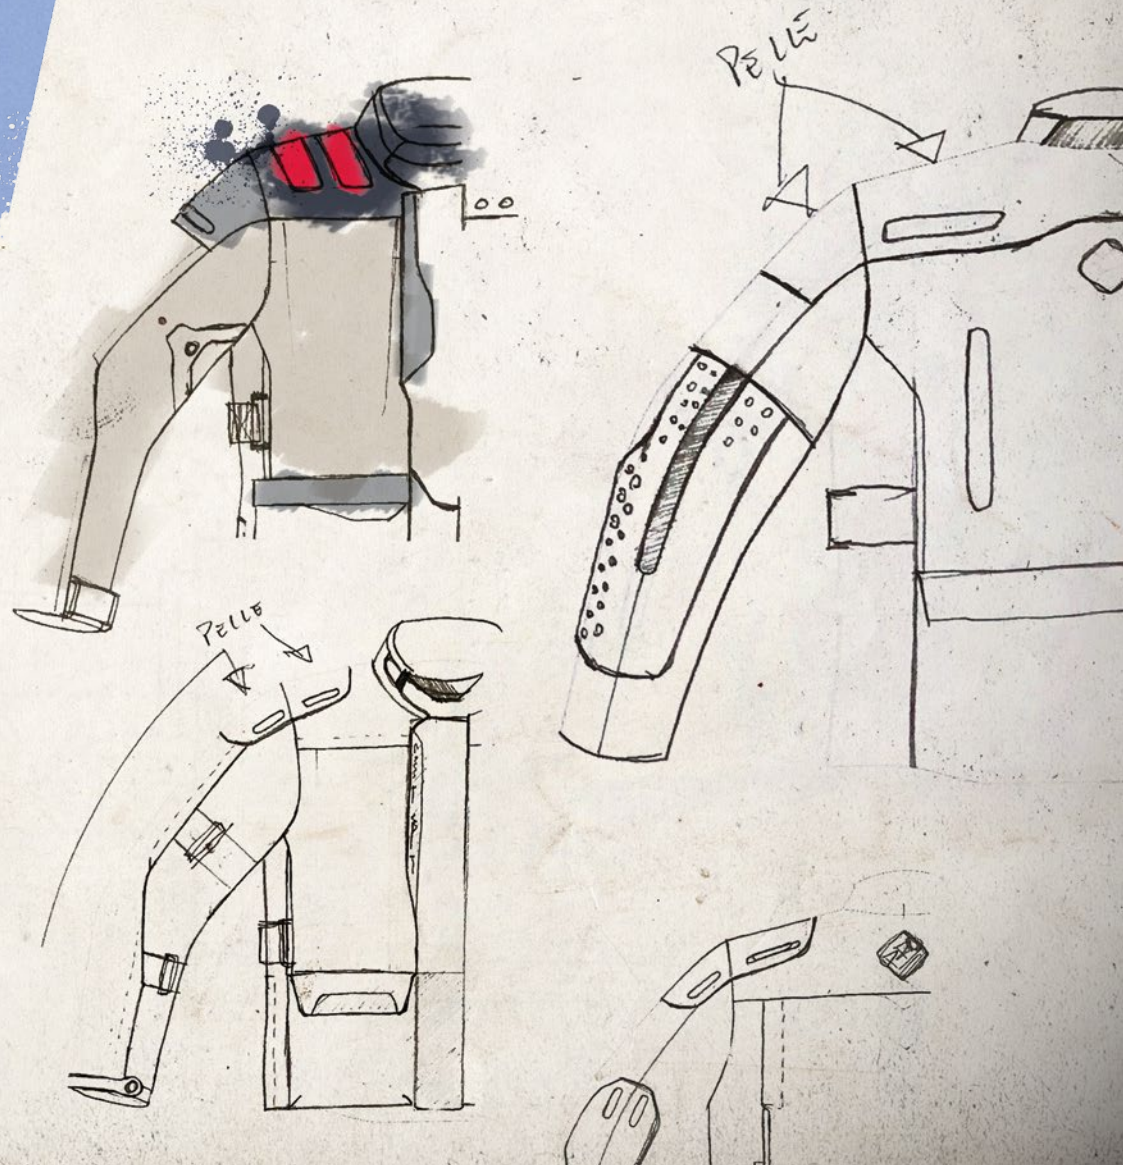

THE INSPIRATION.

The spirit of the rallies that have become legend is blended with cutting edge technology.

A MARK OF STYLE ON THE ROAD.

Vintage from a distance. Modern and technical from close up. The *T.ur* style makes a name for itself on the motorcycle scene with a unique design.

EXTREME RESISTANCE.

The **SuperFabric®** technology takes a fabric and overlays it with a highly resistant epoxy resin, which geometry, size and thickness can be varied depending on the desired attributes. This technique ensures the **best protection, without compromise on flexibility and comfort.**

 **SuperFabric**

Unrivalled Performance. Unmatched Durability. Unlimited Possibilities.

ABRASION RESISTANCE

Fifteen times the abrasion resistance of heavy weight aramids.

CUT RESISTANCE

Over five times the cut resistance of heavy weight aramids.

PUNCTURE RESISTANCE

Highly resistant to perforation.

FLAME RESISTANCE

Flame retardant and self-extinguishing.

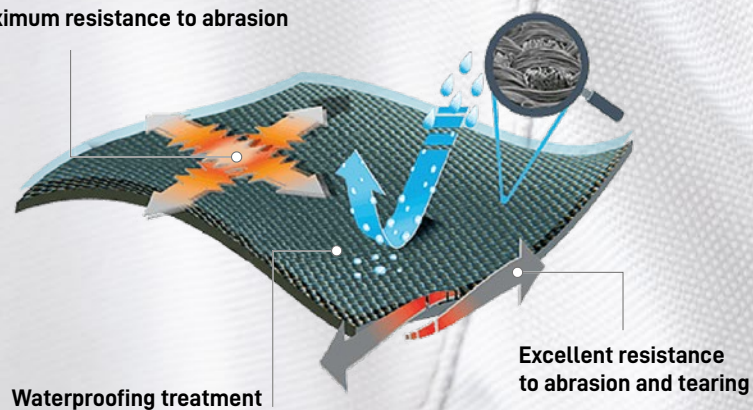

THE QUALITY THAT MAKES THE DIFFERENCE.

CORDURA®
Fabric

Concentration and attention to riding are fundamental for facing the most difficult environments in the world. For this, you need the utmost comfort that only **CORDURA®** can guarantee: original heavy-duty **Sanforized** fabric with high resistance to abrasion, **tough** tear resistance and water repellent, thanks to the external *Deep Water Repellent* treatment, joined to the inner membrane.

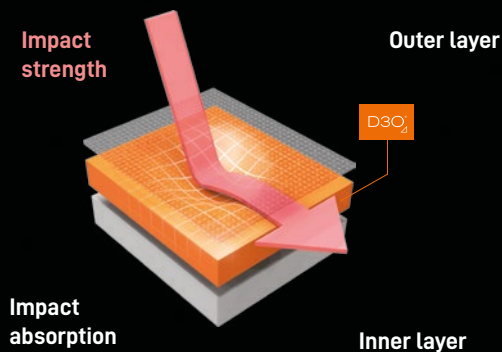

Special construction of the fibre for maximum resistance to abrasion

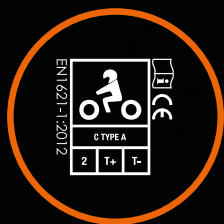

PROTECTION WITHOUT COMPROMISE.

Curiosity is the engine of discovery. But it is safety that makes the exploration bold. *T.ur* has adopted the most advanced D3O® protectors ever: the new breathable D3O® LP2 PRO – Level 2 in a world preview which, thanks to the *Tri-ventilation Technology*, offer **45% more ventilation** compared to the traditional D3O®. You will also feel them to be comfortable and flexible like a second skin.

D3O®

Long lasting highly protective material.

CE - EN1621-1:2012 - Level 2 certification, in all environments (hot, cold, wet, moderate).

Ergonomic design for perfect integration with special pockets.

GUARANTEED WATERPROOFING.

Tur has adopted HYDROSCUD®, the exclusive patented system of **Tucano Urbano**, to ensure **100% waterproofing and breathability**. An exclusive construction which combines coated fabrics with taped seams and waterproof flaps.

Watertight construction.

Taped seams.

High-performance materials.

High breathability.

**TO RIDE 100 PERCENT CREASE-PROOF
WITH ANY RAIN.**

HDry
WATERPROOF BREATHABLE

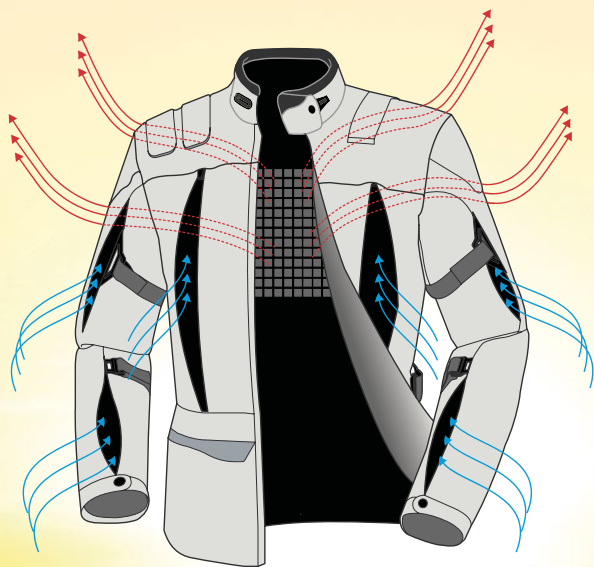

3D LAMINATION TECHNOLOGY.

Our winter gloves use the HDry® system, that offers **the highest level of waterproofness, breathability and insulation.** The waterproof and breathable membrane is firmly laminated to the glove's shell inner side and **there are no gaps where water can penetrate.** Wind is blocked on the glove's outer surface and a large volume of dry air keeps your hand warm and comfortable.

MAXIMUM VENTILATION.

Riding, especially on long journeys, requires great concentration: an absolutely fundamental factor for keeping the attention to riding high and **maintaining body temperature as far as possible.**

T.ur has organised, in all the smallest details, the best measures for guaranteeing maximum ventilation.

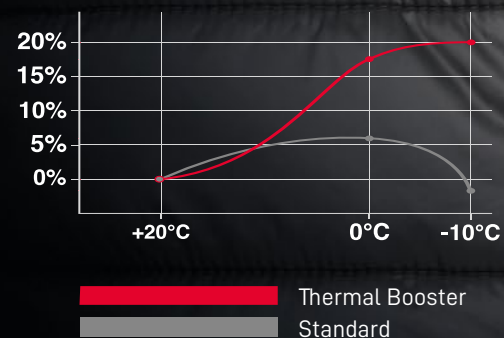

SUPERIOR THERMAL INSULATION.

Thermore®

THERMAL BOOSTER

The intelligent padding: the colder it is, the warmer it gets.

-  + 20% thermicity as the temperature drops.
-  Continuous, constant and long-lasting warmth.
-  Patented antipilling treatment.
-  Easy to wash and exceptionally long-lasting.

1. MAIN JACKET, CE – CLASS AA CERTIFIED IN ACCORDANCE WITH DIRECTIVE PREN17092

- HYDROSCUD®:
 - Outer shell in two extremely tough fabrics, with water-repellent treatment:
 - Chest and inner sleeves in beaten weave Oxford 300 polyamide to guarantee lightness, comfort and wearability
 - Shoulder and outer sleeves in Oxford 600 CORDURA® to guarantee resistance in the points at greatest risk of impact
 - Laminated fabrics with 20K/20K membrane
 - Taped seams
- Extremely tough SUPERFABRIC® fabric inserts on the elbows
- Metal plates on the shoulders
- Cow leather inserts on the shoulders
- Super-strong YKK zips in the points of greatest stress
- Lining in polyester mesh
- – Outer winter neck, detachable and re-attachable with zip and magnet
- Edge and inside of neck in soft neoprene
- Breathable LP2 PRO protectors in D30® CE-Level 2 on elbows and shoulders as standard (world preview)
- Pockets for the CP1 CE protectors in D30® on the chest
- Aero 3D mesh pocket for the VIPER PRO CE protection in D30® on the back
- Small low three-dimensional pocket
- Cuff with Lycra and neoprene spat build
- Looped band on the shoulders for the action camera
- Contrasting padded cow leather inserts on the right shoulder
- Double openings front ventilation, with special build waterproofing for the WR zip: the zip placed inside the outside flap is not directly hit by the rain

- WR ventilation zip on the back
- Side flaps with zip on the bottom to improve comfort
- Adjustable on the biceps, forearm, wrist and waist
- Neck with micrometric adjustment and non-flap fastening
- Wide quick access double pocket under the seal flap
- Bottom left watertight outer cargo pocket
- Quick access bottom right outer cargo pocket with magnet and velcro
- Rear outer cargo pocket
- Two inner cargo pockets
- Refractive prints
- Arrangement for housing the elastic back belt (purchased separately: Safety&Support System – code T602), to discharge the weight of the jacket
- Connection system to the P-ZERO trousers (code T8174M)
- Waterproofing: 20,000 mm
- Breathability: 20,000 gr/m2/24h
- Length: 76 cm (size 50IT-L)

2. HYPERTHERMAL PADDED INNER JACKET, ULTRALIGHT, REMOVABLE AND CAN BE WORN SEPARATELY

- Outside and lining in polyamide quilt
- THERMORE® – Thermal Booster (170 gr)
- Different sized inside and outside pockets
- Side openings for housing the back belt
- Connection to the main jacket by zip

G-ZERO T904HM

GLOVES DESIGNED TO GUARANTEE MAXIMUM WARMTH

6 sizes S / 3XL

N Black

Double glove structure: an outer one and an inner one joined together by velcro

4-finger outer glove, detachable for separate drying:

- EN 13594:2015-CE motorbike certified, only if used as a double glove
- ring finger and little finger joined for maximum warmth and protection in the case of collision, without limiting manoeuvrability
- HDry®: waterproof breathable barrier united with the outer layer to maximise protection and manoeuvrability
- Twill palm with real goatskin leather inserts
- Flexible anti-abrasion insert, in micro-injected rubber, on the palm (1)
- Silicone rubber prints on the fingers to improve grip (2)
- Twill fourchette
- Windbreaker back, with goatskin leather flaps and inserts in tough, waterproof 1680D Balistic
- Padding on the back for greater warmth
- Direct protective injection on the ring finger
- Soft inserts on phalanxes
- Stretch goatskin leather flap on the back for greater comfort
- Rigid knuckle protectors lined with 1680D Balistic (3)
- Openwork leather outer with refractive underlayer for greater visibility
- Contrasting real leather inserts on the cuff
- 1680D Balistic flap with micro-injection ends for easy opening
- Elastic strip on cuff for adjustment
- Three-layer visor cleaner insert: enables perfect cleaning of the visor and at the same time to easily bend the thumb (4)
- Extra-long cuff
- Touch screen compatibility (5)

5-Finger inner glove that can be worn separately:

- THERMORE® – Thermal Booster (130 gr) padding (7)
- Soft suede effect micro-fibre palm
- Silicone rubber print to improve grip
- Soft shell back with silicone rubber print
- Fur-fleece lining on back for maximum warmth (8)
- Micro-fibre lining on palm for maximum sensitivity on controls (9)
- Elastic adjustment on cuff (10)
- Inner cuff in jersey
- Touch screen compatibility (11)

#TURIDERS

Let the challenge begin. *T.ur* arms the adventures that are a severe test for men, bikes and equipment. For this, it comes down to the track with two great riders who compete in the toughest discipline, where you only win if speed and strength, courage and shrewdness, impetuosity and self-control coexist: the **RALLY**.

ALESSANDRO BOTTURI

WINNER OF THE AFRICA ECO RACE

Body of a superhero, heat and courage to bend the motorcycle to his will, ALESSANDRO BOTTURI is the rider that everyone dreamed of being.

JACOPO CERUTTI

Best Italian rider at the finish of the Dakar 2016, JACOPO CERUTTI is the fastest Italian rally rider in the business.

A person wearing a white helmet and dark clothing is riding a motorcycle up a dry, grassy hill. The hill is covered in sparse, yellowish-brown vegetation. In the background, there are large, dark, rolling hills and a range of jagged mountains with significant snow cover under a clear blue sky. The lighting suggests it's either early morning or late afternoon, with long shadows and a warm glow on the terrain.

THE JOURNEY HAS ONLY JUST STARTED.
